Applicant's independent claims 6, 25, 35 and 40 each recites, *inter alia*, a backup system with a structure as defined in the specification (pages 13-17 and pages 20-29) including a log management device (6) managing original data before a write access occurs as a log including recording a time of the log, and generating an entire log by gathering logs of two or more computers, by selecting an oldest log from among logs for the same area in the sharing medium if there are the logs for the same area among the logs of the two or more computers, and by discarding the remaining log among the logs for the same area. Applicant's independent claims 6, 25, 35, and 40 each comprises a particular combination of element, which is neither taught nor suggested by the prior art.
